FICTIONAL TEST DOSSIER — Evidentra. Example Biomedical Pvt Ltd and the OxiTrack OT-500 are not real. Not a regulatory submission.

Plant Master File

Prepared as per Appendix I of the Fourth Schedule of the Medical Devices Rules, 2017.

Document number: EB-PMF-001 Revision: C Document date: 1 August 2026

1. General Information

Site: Example Biomedical Pvt Ltd, Unit 7, Example Industrial Estate, Navi Mumbai 400700. Manufacturing activities: assembly, calibration, testing and packing of non-invasive pulse oximeters. No toxic or hazardous substances are handled apart from alkaline batteries, stored in a closed cabinet. Employees: 38 (production 20, quality control 8, warehousing 6, distribution 4).

2. Personnel

Organisation chart: Managing Director; Head of Quality (management representative); Production Manager; QC Manager. Key personnel hold degrees in electronics or biomedical engineering with at least 5 years of medical-device experience. Training is recorded in the training matrix EB-TRN-001.

3. Premises and Facilities

Assembly is performed in a controlled area (ISO class 8 equivalent not required for this non-sterile device). Plant layout drawing EB-LAY-001 (scale 1:100) is attached.

FICTIONAL TEST DOSSIER — Evidentra. Example Biomedical Pvt Ltd and the OxiTrack OT-500 are not real. Not a regulatory submission.

4. Equipment

List of equipment and instruments used for manufacturing and testing: SpO2 simulator (calibrated), electrical safety analyser, environmental test chamber, torque drivers, label printer.

5. Sanitation

Cleaning schedule SOP EB-SOP-012; pest control by contracted agency every quarter.

6. Production

Process flow: incoming inspection, PCB assembly (outsourced, approved supplier), final assembly, calibration against SpO2 simulator, functional test, packing.

7. Quality Assurance

Quality management system per ISO 13485:2016 and the Fifth Schedule of the Medical Devices Rules, 2017.

8. Storage

Finished goods stored at 10–40 °C in a segregated warehouse area.

9. Documentation

Document control per SOP EB-SOP-001; device history records retained for the device lifetime plus two years.
